

SHARE AN IMMERSIVE EXPERIENCE

Share your immersive virtual experience with an audience in real time. Present projects or ideas in a more effective, dramatic fashion to fellow colleagues, customers, students and investors, particularly while at conferences, trade shows, or in the classroom.

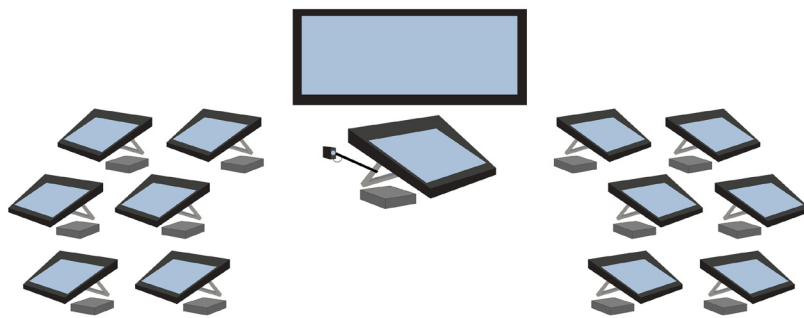

A unique presentation experience where users can invent, innovate, and collaborate in 3D.

Share the power of a virtual display with an audience

The zView webcam capture application for zSpace builds upon the interactive 3D platform's collaboration capabilities, allowing a presenter to collectively capture and share their experience with zSpace to larger audience.

zView is augmented reality display where the audience is able to appreciate the leader's virtual perspective on any 2D projector, display or TV.

- Used as a classroom aid, zView helps instructors lead students through projects in the most relevant way possible.
- zView is especially valuable to internal and third party developers, such as Unity developers, as the technology allows for easier and broader knowledge-sharing within the development community and their customers.

Product includes:

- zView software
- Camera
- Mounting bracket for camera

Features:

- Video capture and presentation - record, save, and share with others.
- Content Creation - import existing content and use toolset to mark and annotate.

zSpace Inc is a leading-edge technology provider located in Sunnyvale, CA. The company is privately held and has filed more than 30 patents for its innovative technologies.
